

a Forecast-to-review workflow

Issued forecasts precede target hours; realised labels enter only after allocation.

b Controlled 2 × 2 probability comparison

	Gaussian	Selected t
F0 Original	M0	M2
F1 Mapped	M1	M3

Common weather, thresholds, hours and R

Delayed historical replay; fixed-specification transfer to the Danish combinations.

c Separate evaluation targets

Marginal support

Threshold errors and sensitivity

Joint probability

Brier loss and reliability

Review performance

Slots, event hits and early coverage
